Mr. John Hogarth
Plant Manager
Exide Technologies
2700 South Indiana Street
Vernon, CA 90058

Dear Mr. Hogarth:

Enclosed are the revised Title Page, Table of Contents and Section H of your Title V Facility Permit for Exide Technologies located at 2700 South Indiana Street, Vernon, CA. The revised permit reflects the following changes:

Section H (Permits to Construct)

Appl. No.	Description	Device(s)	Process	System
554906	Changing Condition D182.6 to provide a 60-day extension to source test and submit source test reports.	D128	1	4

This revision is covered under A/N 554907 and is considered a "minor permit revision" to the Title V permit. The proposed permit was submitted to the EPA for review on August 9, 2013. Although the EPA's 45-day review period will expire on or about September 23, 2013, EPA has performed an expedited review of the proposed permit and has no comments at this time. The permit is now eligible for issuance. Please note that although EPA has terminated their review early, the 60 day period for the public to petition the Administrator to object to the permit begins the day after EPA's 45-day review period would otherwise end. Also note, that if the permit is later found to require corrective steps (including, but not limited to, reopening the permit for cause), the expiration of both EPA's review period and the public petition period without EPA objection does not compromise the Agency's authority to take such measures.

Please review the attached sections carefully. Insert the enclosed sections into your Title V Facility Permit and discard the earlier version.

The operation of your facility is bound by the conditions and/or requirements stated in the facility Permit to Operate. If you determine there are administrative errors, or if you have any questions, please contact Mr. Marco Polo, Air Quality Engineer at (909) 396-2633 or by e-mail at mpolo@aqmd.gov within 30 day of the receipt of your permit.

Sincerely,

Andrew Y Lee, P.E.
